

EARLY CHILDHOOD Training & Resource Fair

8am - 3:00pm | Saturday, June 14, 2014 | Our Lady of the Lake University | 411 SW 24th St, 78207

Welcome to the third annual "EARLY CHILDHOOD TRAINING & RESOURCE FAIR" offered by your City Council Representative, Shirley Gonzales, in partnership with Voices for Children of San Antonio & Our Lady of the Lake University.

Our youngest children hold our greatest hope for the future, depending on us to provide safety, security, and knowledgeable, nurturing support. We hope this event will better prepare the early educators of young children with the knowledge and skills to provide our youngest community members with appropriate developmental opportunities that will help them grow and mature into successful students and productive adults.

Get Daddy Involved! Catherine Lano, Family Service Association Father involvement in school will vary with fathers' level of comfort. It's time to peak their interest! Join us in learning how.	Enriching Math Instruction Through Discovery Learning Coach Maria Carrillo, PreK-4th Coach Learning is like a complicated riddle that we as teachers try to solve daily. It doesn't make it any easier that each child presents their own riddle to solve. How do we reach the different levels of understanding? Is it even possible to reach each child without having to do 21 different lessons of the same thing? The answer is yes! Discovery Learning is when teachers provide experiences, materials, and interactions that allow children to stretch their thinking, imagination, language, and understanding through play. This training will help you use play in a way that will enhance concepts at a level that your students will truly enjoy and you as a teacher will too. Come and get some fresh new ideas on math skills and have fun while you engage in some of your own discovery learning!	I like to Move it, Move it! Linking literacy learning to Motor Activities in Early Childhood Classrooms Bridget Moggard, PreK-4th Coach This presentation will highlight brain research which supports the link between purposeful movement and academic learning. Participants will learn about the connection between motor development and increased cognitive/ literacy development. It focuses on ways that movement activities can be easily incorporated into the everyday routine while still meeting academic demands in an Early Childhood classroom. From reading stories to recognizing letters, there are engaging ways to move and learn! Pre-K guidelines: Fine Art VII, C.3. Child creates or recreates stories, moods, or experiences through dramatic representations. Physical Development - 18. A.2. Child coordinates sequence of movements to perform tasks.	Moving Motor Skills in the Right Direction Jennifer Fernandez and Eliseo Cano, PreK-4th Coach This session will take a close look at preschoolers' gross and fine motor skills. Those attending will learn about why these skills are important, how they are related to each other and what strategies can be used to help develop motor skills in the early childhood classroom. Participants should be prepared to think and discuss, move their bodies and engage in hands-on activities for a fun day of learning! Pre-K Guidelines: Physical Development A & B (Gross & Fine Motor) D.K.1, D.K.2, D.K.3, D.K.4, D.K.5	Relationships & Guidance Yolanda Chapman, Family Service Association Create Safety through the development of healthy attachments that lay the groundwork for self-regulation. Build Connections through attuned interactions that help us better meet the needs of all children. Coach children through Problem Solving opportunities that teach social skills that will last a lifetime. Implement Baby Circle Time, an innovative approach to meet the one-to-one connection needs of infants and toddlers.	Educating Young Children With Special Needs Jennifer Fitzhugh, The Brighton Center This presentation is designed for those who work with young children who may not be developing as their typically developing peers. We will discuss what the various disabilities look like, how teachers can accommodate these children in their preschool classrooms and how to assist parents in getting the services they need for their children as they age out of preschool.
Stop the Bullying Eliseo Paez An interactive approach on ways to teach children of the effects of bullying. Participants will leave with an array of tools/activities that can be implemented in a group setting.	Incorporating Literacy in Curriculum Weaving a Literacy Web Monica Guzman, PreK-4th Child Center In this training we will understand the importance of literacy and why we should work to expand it in the classroom. We will know what is meant by a "Literacy Web" and go through the stages to form a literacy web. Our goal is to also leave with an understanding of the project approach and its relation to this web. Using the Literacy Web will give us a true emergent curriculum and avoid the question, "What should we do next?"	Discover your Creative Expressions Michelle Cole, PhD, D'Yama Isabelle & Esperanza <i>Come, Our Lady of the Lake University</i> This hands-on workshop will allow you to discover your creative voice! Teacher and student will collectively enjoy this process as this session provides the importance of experimenting with materials, connect to key learning concepts and enhance overall creative expression.	Body, Mind, Spirit: Taking care of Yourself to be Better at Your Job Jerick Simpson, Family Service Association This class shares important self-care skills that will enable teachers to take care of personal and family demands in healthy, stress-reducing ways. Through holistic and therapeutic strategies, participants are given information on how to effectively address physical, mental and relational well-being. The goal is that teachers will be in a much better place to reach their professional goals and truly impact the children they teach when they reduce personal stress and find personal peace.	Exploring Early Literacy Corinne Sanchez, San Antonio Public Library Learn about the 5 practices every child needs to be prepared to read and how the San Antonio Public Library can help.
